

Vishwas Reddy

✉ vishwasr762@gmail.com ☎ +91-7795279140 📍 Bangalore, Karnataka

Education

B.E., Information Science, B.M.S. College of Engineering, Bengaluru CGPA: 9.002/10	2023 – Present
Class XII, Vidyaniketan PU College, Gangavathi, Karnataka Percentage: 96.2%	2021 – 2023
Class X, Sri Vidyaniketan School, Sriramnagar, Karnataka Percentage: 91%	2020 – 2021

Skills

Languages C, C++, Java, Python, JavaScript	Core Subjects DSA, OOP, DBMS, OS, Computer Networks (CN), CLC, Computer Organization & Architecture (COA)
Backend / Development Node.js, Express.js, React.js, REST APIs, SQL, MongoDB	Tools Git, GitHub, Unix.

Experience

PRISM Intern – Compiler Optimization Research, Samsung PRISM Program • Developing compiler-assisted memory access monitoring tools using LLVM/Clang to analyze and optimize runtime memory behavior. • Implementing instrumentation passes to detect memory access inefficiencies including redundant loads, false sharing, and poor locality. • Exploring and applying loop optimizations, prefetching strategies, and redundancy elimination techniques to improve memory performance. • Benchmarking optimizations against real workloads to quantify speedup and memory efficiency gains.	01/2026 – Present Bengaluru
--	--------------------------------

Projects

Hybrid Vision-Based Indoor Localization & Intent-Aware Navigation Framework, Python, OpenCV, Computer Vision, SLAM, AR, Android, IMU Sensors • Developed a vision-based indoor localization framework for GPS-denied environments using smartphone camera and IMU sensors. • Designed a localization pipeline using Visual-Inertial SLAM concepts and feature matching (ORB-SLAM3-inspired) for accurate indoor positioning. • Built an intent-aware navigation workflow enabling natural language destination queries and context-aware POI recommendations. • Integrated AR-based navigation for real-time indoor guidance with zero external hardware requirements.	2026 – Present
ProctorAI, React, Flask, Python, MediaPipe, YOLOv8 • Engineered a next-generation AI-powered exam proctoring system with a privacy-first design, combining computer vision and behavioral analysis. • Built a full-stack application with a React frontend and Flask REST API backend, supporting Admin/Student authentication and end-to-end exam management.	10/2025 – 11/2025
Library Management System, Node.js, Express.js, MySQL • Designed a relational database schema in MySQL to manage books, members, and borrowing records, enforcing data consistency and referential integrity. • Built a structured backend API enabling real-time operations — book issuance, returns, and search — with dynamic server-side rendering.	02/2025 – 04/2025
